Appln. No. 09/662,507 Amd. dated February 5, 2004 Reply to Office Action of October 6, 2003

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:
Listing of Claims:

- 1. (Previously presented) A method for removing nitrate from nitrate-contaminated water comprising treating said water in a hydrogen-fed bioreactor with autotrophic, hydrogen-oxidizing denitrifying bacteria.
- 2. (Original) The method according to claim 1 wherein the bacteria are purple, non-sulfur phototrophic bacteria.
- 3. (Previously presented) The method according to claim 11 wherein the hydrogen is produced by electrolysis of water.
- 4. (Original) The method according to claim 1 wherein the bacteria have been isolated from nitrate-containing groundwater.

Claims 5-8 (Canceled).

9. (Previously Presented) The method according to claim 1 wherein the bacteria use nitrate as a respiratory

Appln. No. 09/662,507 Amd. dated February 5, 2004 Reply to Office Action of October 6, 2003

terminal electron acceptor whereby nitrate is converted to nitrogen gas.

- 10. (Previously presented) The method according to claim 1 wherein the bacteria belong to the *Proteobacteria* of the domain Bacteria.
- 11. (Previously Presented) The method according to claim 1 comprising generating hydrogen gas by a method selected from the group consisting of corrosive oxidation of iron, biological fermentation, or electrolysis.
- 12. (Previously presented) The method according to claim 1 wherein the bacteria are supported on a solid surface to support biofilm formation by the bacteria.
- 13. (Previously presented) The method according to claim 12 wherein after the water has been treated by the bacteria on a solid support, the water is percolated through a sand filtration unit.
- 14. (Previously Presented) The method according to claim 1 wherein the nitrate-contaminated water is drinking water.
- 15. (New) The method according to claim 1 wherein the bacteria do not require nitrate to function.
